

## Eradication of Parvo Virus

### Pens and Kennels;

Remove all equipment, feeding and drink bowls, baskets, toys and any other items.  
Dispose of any droppings in area ensuring animals cannot come into contact with them.  
Thoroughly wash the area with a quality detergent such as DSC 1000, pay special attention to corners, edges and ledges.  
Start high and work down, commencing at the back of the pen or kennel and work your way to the exit.  
Once washed prepare a 1:50 solution of Virkon S, that is 100 grams in 5 litres of water or 1 kg in 50 litres of water.  
Spray the area as described above starting high and working down. Commencing at the back working towards the exit.  
Apply 300 ml per square meter, 1 litre of diluted solution will cover 3.1 square meters of area.

### Equipment;

Anything that has come into contact with infected animals must be disinfected, feed bowls, water bowls, baskets, blankets, toys, leads and leashes etc.  
Prepare a large bucket of Virkon S 1:50, place items in the bucket and soak for 5 minutes.  
Items such as bowls and drinkers do not need rinsing. Baskets, toys, blankets and leads require rinsing in clean water and allowed to dry thoroughly.

### Run areas;

Remove any droppings and dispose of them in an area where animals cannot come into contact with them.  
Spray area with Virkon S 1 : 50, 300 ml per square meter.  
Grassed areas; remove droppings as above, cut grass as low as possible and dispose of the cuttings in an area where animals cannot come into contact with them.  
Spray area as above; do not exceed the recommended dilution rate as it may damage the grass.

### Personal;

Any clothing or footwear that has been in contact with infected animals should be washed in Virkon S 1 :50 and thoroughly rinsed in clean water and allowed to dry.

### Other uses;

Virkon S is highly effective against all viruses, bacteria and fungi including salmonellae, E Coli, Chlamydia, Ringworm, Rotavirus, Coronavirus to name a few.  
Use Virkon S at 1 :100 weekly to disinfect your kennels and equipment.

### Pack Sizes;

50g Sachet, 1 kg Canister, 2.5 kg Canister, 5 kg Canister, 10 kg Bucket.

### Preparation;

Always read the safety instructions first and follow the label instructions. Virkon S is a pink coloured powder with a pleasant odour.  
Mix with warm water for the best results.
